2010-2020

Supports Hitag Pro Read Write

Add Lost or Spare Dump Via MCU Dumps

AH32 - BJ32 - DPLA - FK72 - HPLA   Dealer Key

SW03

Firstly you need to use HW53 to read out the D-Flash and EEE data in the KVM
Then use Lock50 HW01 JLR Key Programmer to generate new key and data files, finally write back to KVM the new Dflash + EE files.

Optionally, you could also now use one of our emulators that would emulate an existing key from the data you have extracted from an existing KVM with SW09
